

BREITLING MAINTENANCE SERVICES

Your Breitling is a precision instrument equipped with sophisticated functions. A multitude of parts in a very limited space contribute to ensuring 24/7 performance.

To ensure the performance of your Breitling in an optimal manner over time, it is both important and highly recommended that maintenance services be conducted periodically.

We advise you to entrust your watch exclusively to a Breitling authorized service center. You will find a list of retailers and service centers on our website at www.breitling.cn

BREITLING AUTHORIZED SERVICE CENTERS OFFER TWO TYPES OF SERVICE. THE FREQUENCY OF THESE SERVICES MAY VARY DEPENDING ON THE CONDITIONS OF USE.

1. MAINTENANCE SERVICE (recommended every 2 years)–mechanical and quartz watches

This service includes : checking movement parameters and watch functions, changing all seals, checking water resistance, cleaning the case and metal bracelet; changing the battery for quartz watches.

2. COMPLETE SERVICE (recommended every 4-6 years)–mechanical and quartz watches

This service includes : disassembly, cleaning, exchange of standard movement parts (including certain hands), assembly, lubrication, adjustment and setting of movement function parameters; changing all seals, checking water resistance; battery replacement for quartz watches; polishing of the case and bracelet.

We grant a price reduction on the repair price of watches without bracelet or with black DLC coating or Breitlight.
